

My name is Geoff Clement.

I grew up in Atlanta, and earned my B.S. degree in Mathematics from Emory University. I finished my M.Ed. degree in Math Education at Georgia State University in 1987. In 2017, I completed an Ed.D. degree in Curriculum and Instruction with an emphasis on early childhood and elementary education/ mathematics education at Georgia State University. I have enjoyed teaching high school math for a total of 11 years in College Park, in Colombia (South America), and in Coffee County, and I taught at ABAC (Abraham Baldwin Agricultural College) from 1995-2011 (16 years). Though I loved ABAC, I have been glad to be here at Gordon State College since 2011, and I see it as a privilege to teach YOU.

I have a lovely wife and 4 daughters (plus 3 sons-in-law, two in the photo above), and I enjoy biking, walking my dogs, watching movies, woodworking (lately with pallet wood), yard work, reading, and, of course, math problems! I am especially interested in international methods for teaching number operations and problem solving.

I am very grateful for God's grace and love through Jesus Christ. I desire to honor Him in my life as a husband, father, and teacher, and in my church and community involvement.

I hope you "live and learn", enjoying the process of working hard and having breakthroughs in understanding, and that you "do your best" to "rise to the challenge" of *doing mathematics!*
