**Upon completion of the course, student should:**

1. Use knowledge of logical fallacies, truth tables, and Venn diagrams to determine the soundness of logical arguments.
2. Determine the validity of a statistical study and what information can be inferred from it.
3. Use and interpret descriptive statistics in numerical and graphical forms.
4. Solve basic applied problems involving unit conversion and probability.
5. Interpret and apply linear, quadratic, and exponential models, including applications involving financial literacy.

**Course Prerequisites:**

- **STANDARDS OF ACADEMIC CONDUCT AND STUDENT INTEGRITY**
  - The College expects academic honesty from students and instructors. Students have the obligation both to themselves and to the College to make the appropriate College representative aware of instances of academic deceit or dishonesty. Generally, this entails making the situation known to the instructor, and if needed, to the Dean of the student's school. Likewise, faculty members are responsible for enforcing the stated academic standards of the College. Instances of violating academic standards might include, but are not necessarily limited to, the situations outlined below:
    - **Cheating** – Receiving or providing unapproved help in any academic task, test or treatise. Cheating includes the attempt to use or the actual use of any unauthorized information, educational material, or learning aid in a test or assignment. Cheating includes multiple submission of any academic exercise more than once for credit without prior authorization and approval of the instructor.
    - **Plagiarism** is presenting someone else's work as though it is your own. In an academic community the use of words ideas or discoveries of another person without explicit, formal acknowledgement constitutes an act of theft or plagiarism. To avoid the charge of plagiarism, students must engage in standard academic practices such as putting quotation marks around words that are not their own, employing the appropriate documentation or citation and including a formal acknowledgement of the source in the proper format. Students are expected to use the proper APA format for citations. An online APA manual can be found at: <http://www.dianahacker.com/resdoc/>.
    - **Fabrication** involves inventing or falsifying any data, information, or records.
    - **Obstruction** is impeding the ability of another student to perform assigned work.
    - **Collusion** comprises assisting any of the above situations or performing work that another student presents as his or her own.
    - **Use of AI** will be determined by the Faculty member.

Any student reporting any type of sexual harassment, sexual assault, dating violence, domestic violence, or stalking must be made aware that any
